Starred items indicate variance from Sunnyvale Municipal Code requirements.

ANALYSIS

Description of Proposed Project

The applicant is proposing an addition of 290 square feet to an existing 1,798 square foot single-story residence. The addition is proposed in the rear and reducible front yard areas, and the house will total 2,088 square feet when completed. The scope of the project is to expand one of three bedrooms into a mater suite. The proposed home will have three bedrooms, family room, living room, kitchen, and a two-car garage.

As part of the project, the applicant is requesting that a portion of the new addition be constructed six feet from the property line, where nine feet is the minimum allowed by Sunnyvale Municipal Code (SMC). This street side yard is considered a front yard area and requires a 20-foot setback but is allowed to be reduced under SMC 19.34.040 to a minimum of nine feet.

Background

Previous Actions on the Site: No other planning permits have been reviewed for the site. The home was originally built in 1964.

Environmental Review

A Class 1 Categorical Exemption relieves this project from California Environmental Quality Act provisions. Class 1 Categorical Exemptions include modifications to existing structures.

Variance

Site Layout: The existing 6,211 square foot parcel is a rectangular lot with the home situated near the center of the lot. The existing home conforms or exceeds current setback requirements with a six-foot side yard, 21-foot front yard, 12-foot street side reducible front yard, and a 24-foot rear yard. The proposed addition will extend the structure into the reducible front yard area by six feet. (See Attachment E).

The subject parcel is 66 feet wide and 96 feet deep. The lot width meets standards for the R-0 Zoning district since 62 feet is the minimum required for corner lots in this zone. The lot size also meets current SMC standards since 6,000 square feet is the minimum parcel size in the R-0 Zone. Most of the parcels in the surrounding area are similar with 6,000 square feet as the average size. The subject site does not have an irregular configuration, and no physical constraint exists on site. See the Assessor Parcel Map of the neighborhood in Attachment D. The following table shows the parcel sizes for lots in the immediate vicinity.

Property Address	Square Footage of Lot	Lot Widths
721 Ashbourne	6,120 s.f.	65 ft.
724 Ashbourne	7,513 s.f.	78 ft.
725 Ashbourne	6,550 s.f.	65 ft.
727 Ashbourne	6,050 s.f.	60 ft.
729 Ashbourne	6,000 s.f.	62 ft.
730 Ashbourne	6,329 s.f.	66 ft.
731 Ashbourne	6,000 s.f.	60 ft.
732 Ashbourne	6,204 s.f.	64 ft.
733 Ashbourne	6,200 s.f.	62 ft.
734 Ashbourne	6,211 s.f.	66 ft.
735 Ashbourne	6,466 s.f.	65 ft.
737 Ashbourne	11,558 s.f.	
1318 Flicker	7,500 s.f.	77 ft.

Average	6,600 s.f.	65 ft.
1442 Flicker	6,194 s.f.	62 ft.
1441 Flicker	6,208 s.f.	64 ft.
1336 Flicker	6,193 s.f.	62 ft.
1335 Flicker	6,208 s.f.	64 ft.
1330 Flicker	6,192 s.f.	62 ft.
1329 Flicker	6,208 s.f.	64 ft.
1324 Flicker	6,191 s.f.	62 ft.

Architecture: The proposed addition will match the stucco material that exists on three sides of the home (excluding the front). The addition will also match the same composition roof material.

The following Guidelines from the Single-Family Design Techniques were considered in the analysis of the project architecture:

Design Policy or Guideline (Architecture)	Comments
2.2 Basic Design Principles Respect	The addition would occur in the rear
the scale, bulk, and character of	and reducible front yards of the
homes in the adjacent neighborhood.	existing single-story house. The

3.1(D) Design Techniques	The proposed addition is not
Where significant additions to existing	significant in terms of new square
homes are planned, it is generally	footage versus existing square
better to place those additions at the	footage.
rear of the house or at the side.	

Parking/Circulation: As required by Sunnyvale Municipal Code, the site provides a two-car garage and two uncovered parking spaces.

Compliance with Development Standards/Guidelines: The site currently meets all standard requirements for the R-0 Zoning District. The requested Variance would allow an exception to the reducible front yard setback (six feet where nine feet is required).

Expected Impact on the Surroundings: The proposed addition would have a minimal impact to the surrounding neighborhood. If the Variance is approved, a precedent would be set and there could be an increase in Variance requests in the neighborhood, although staff does not believe this scenario would come

to fruition. The cumulative effect of structures located closer to the street could have a negative impact on the streetscape and reduce visual open space in the area.

Conclusion

Applicant's Justification: The applicant has addressed the three required findings for a Variance in Attachment C – Applicant's Letter of Justification. The applicant contends the following:

- Other similar corner lots in the neighborhood have had similar six-foot side yard setback Variances approved.
- The proposed addition would not be detrimental to the public welfare since the addition is not in the vision triangle and the exterior architecture will remain the same.
- Granting the Variance would not grant a special privilege to the applicant, which would not also be enjoyed by the neighbors.

Discussion: Staff cannot make the first finding regarding exceptional or extraordinary circumstances or conditions that apply to this property due to the parcel's size, shape, use, topography, location, or surroundings. The average parcel size in the surrounding neighborhood is 6,600 square feet, while the subject parcel is 6,211 square feet. Both measures are consistent with SMC standards for the R-0 Zone which specifies 6,000 square feet minimum parcel sizes. The average parcel width is 65 feet in the neighborhood and the subject parcel is 66 feet wide. SMC requires at least 62 feet for corner lots in the R-0 Zone. The site is rectangular and has not topographical features. Therefore, the parcel's shape, size, or topography does not deprive the property owner of a privilege enjoyed by similar property owners.

In addition, staff does not find that there are any physical hardships on this property that would allow this finding to be made.

Staff is able to make the second Variance finding that granting the application will not be materially detrimental to the public welfare. Staff believes the addition will not impact the neighborhood in any measurable sense.

Staff cannot make the third finding that granting the Variance will not grant a special privilege not enjoyed by other surrounding property owners. Approving this request would allow a significant majority of the homes in the neighborhood to make the same findings for reducing the front yard setback, due to similar parcel sizes, lot width, and siting of homes.

There are some residences in the area that do not conform to current SMC setbacks. Most of these nonconforming setbacks were created when the homes were initially constructed in the early 1960's. The applicant refers to several of these in their letter of justification and photos, but these non-conforming setbacks are a part of the original building that took place under the municipal code at that time. The following table shows all Variance applications submitted to the City in the neighborhood. All of the following were approved.

Property Address	Date	Variance Description
721 Ashbourne	1/13/2003	Encroachment of single-story addition into 40-foot vision triangle.
666 Ashbourne	6/16/1982	Exceed allowable lot coverage
717 Ashbourne	9/1/1973	Interior Side yard setback (5' second story where 7' was required)
1342 Flicker	7/16/1980	Side yard setback
1390 Flicker	1/13/1975	Exceed allowable lot coverage 39% where 35% was max allowed)

Findings: Staff is recommending denial for this application because the Findings (Attachment A) were not made. However, if the approving authority is able to make the required findings, staff is recommending the Conditions of Approval (Attachment B) for the project be attached to the approval.

Alternatives

- 1. Deny requested Variance
- 2. Approve the application with attached conditions.
- 3. Approve the application with modified conditions.

Recommended Findings - Variance

1. Because of exceptional or extraordinary circumstances or conditions applicable to the property, or use, including size, shape, topography, location or surroundings, the strict application of the ordinance is found to deprive the property owner or privileges enjoyed by other properties in the vicinity and within the same zoning district.

Staff is not able to make this finding because the site meets all lot dimensional standards for the R-0 Zoning district. The parcel is a regular shape and has no distinguishing topographical features.

The applicant has not demonstrated that extraordinary circumstances apply to this site or that the use would deprive him of a privilege enjoyed by others. Staff was not able to make this finding based upon the above discussion about the parcel configuration. Therefore, staff does not find that the strict application of the ordinance is found to deprive the property owner or privileges enjoyed by other properties in the vicinity.

2. The granting of the Variance will not be materially detrimental to the public welfare or injurious to the property, improvements, or uses within the immediate vicinity and within the same zoning district.

Staff is able to make this finding because approving this request would not be detrimental to the neighborhood.

3. Upon granting of the Variance, the intent and purpose of the ordinance will still be served and the recipient of the Variance will not be granted special privileges not enjoyed by other surrounding property owners within the same zoning district.

Staff is not able to make this finding because approving this request may also allow a significant majority of the homes in the neighborhood to make the same findings for expansion of the home, due to similar parcel sizes, garage sizes, home sizes, and siting of homes.

Recommended Conditions of Approval if the Variance is Granted.

In addition to complying with all applicable City, County, State and Federal Statutes, Codes, Ordinances, Resolutions and Regulations, Permittee expressly accepts and agrees to comply with the following conditions of approval of this Permit:

Unless otherwise noted, all conditions shall be subject to the review of approval of the Director of Community Development.

1. GENERAL CONDITIONS

- A. The Variance shall be null and void two years from the date of approval by the final review authority if the approval is not exercised.
- B. Project shall be in conformance with the plans approved at the public hearing. Minor changes may be approved by the Director of Community Development; major changes may be approved at a public hearing.
- C. The Conditions of Approval shall be reproduced on a page of the plans submitted for a Building permit for this project.
- D. Obtain building permits for the proposed plan.

2. <u>DESIGN/EXTERIOR COLORS AND MATERIALS</u>

- A. Final exterior building materials and color scheme are subject to review and approval by the Director of Community Development prior to issuance of a building permit.
- B. Roof material shall match the existing home or if replaced entirely, be 50-year dimensional composition shingle or equivalent warranty material providing texture and shadow effect, or as approved by the Director of Community Development.

VARIANCE JUSTIFICATIONS

Justifications must be submitted by the applicant with all Variance applications. Use this sheet or a separate sheet of paper to complete all of the three statements below.

In granting a Variance, all of the following justifications must be made by the Planning Commission or the Administrative Hearing Officer:

19.84.050. Findings.

- (a) A Variance from the requirements of this title, except for the height of a ground sign, shall be approved only upon a showing by the applicant that:
- 1. Because of exceptional or extraordinary circumstances or conditions applicable to the property, or use, including size, shape, topography, location or surroundings, the strict application of the ordinance is found to deprive the property owner of privileges enjoyed by other properties in the vicinity and within the same zoning district.

The property is a corner lot on Ashbourne and Flicker and the accompanying photos will show that other property owners on this street have completed remodels that also reveal a 6 foot side yard setback. Granting this variance would allow the home owners to enjoy the same priviledge of expansion as their neighbors, allowing the same overall square footage consistent with the neighborhood.

2. The granting of the Variance will not be materially detrimental to the public welfare or injurious to the property, improvements or uses within the immediate vicinity and within the same zoning district.

Granting this variance would not be detrimental to the public welfare or property since the vision triangle for traffic is maintained and the exterior look of the addition will match the existing house and the general ranch look of the existing neighborhood. This does not inhibit the use or enjoyment of any home in the immediately zoned area.

3. Upon granting of the Variance the intent and purpose of the ordinance will still be served and the recipient of the Variance will not be granted special privileges not enjoyed by other surrounding property owners within the same zoning district.

We do not beleive there are any special priviledges being granted, but instead the home owners enjoyment and use of the property will be brought up to parr with their neighbors.

Thank you for your time and consideration in this matter.

Sincerely,

Lorraine Riess (for Tony Maciejowski and Lorraine Guerrera, owners)

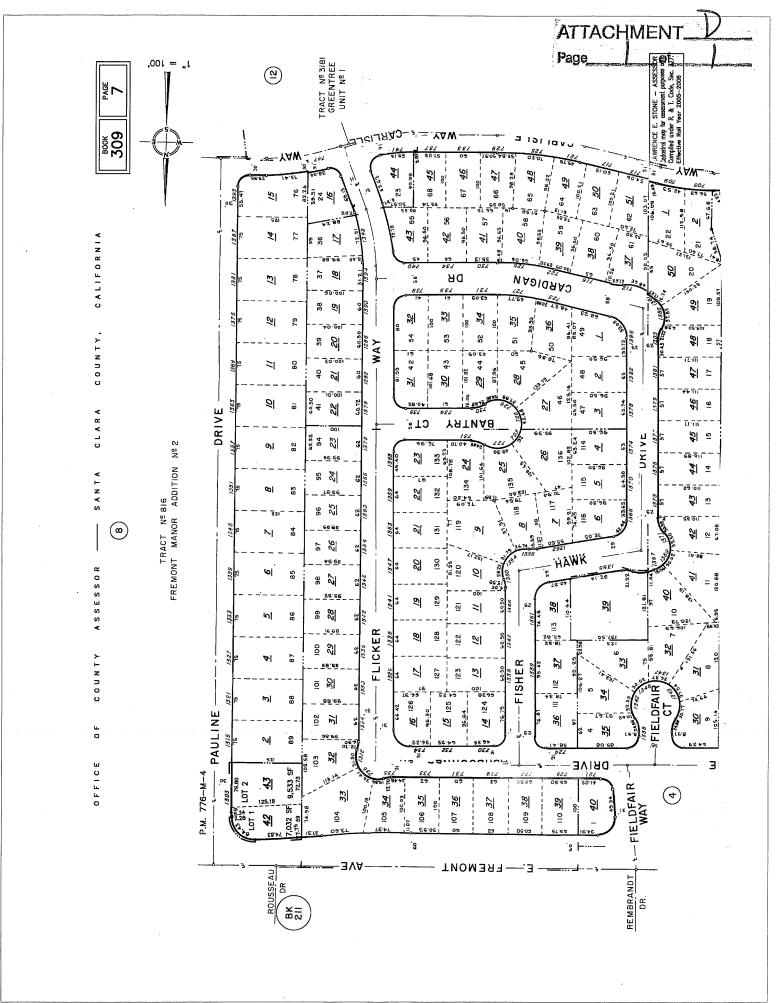

Professional, AIBD
